On October 30, 2020, Sun Chemical provided complete substantive responses for these reviews within the 30-day deadline specified in 19 CFR 351.218(d)(3)(i).⁴ Commerce received no substantive responses from any other interested parties, nor was a hearing requested. On November 20, 2020, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from respondent interested parties.⁵ As a result, Commerce conducted expedited (120-day) sunset reviews of the *Orders*, pursuant to section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2).

Analysis of Comments Received

All issues raised in these reviews, including the likelihood of continuation or recurrence of dumping in the event of revocation, and the magnitude of dumping margins likely to prevail if the *Orders* were revoked, are addressed in the accompanying Issues and Decision Memorandum. A list of the topics discussed in the Issues and Decision Memorandum is included as an appendix to this notice. The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>. In addition, a complete version of the Issues and Decision Memorandum can be accessed directly on the internet at <https://enforcement.trade.gov/frn>. The signed and electronic versions of the Decision Memorandum are identical in content.

Final Results of Sunset Reviews

Pursuant to sections 751(c)(1) and 752(c)(1) and (3) of the Act, Commerce determines that revocation of the antidumping duty orders on CVP-23 from India and China would likely lead to continuation or recurrence of dumping, and that the magnitude of the dumping margins likely to prevail is up to 241.32 percent for China and up to 44.80 percent for India.⁷

Background

The Tulalip Tribes and Washington Department of Fish and Wildlife (collectively the co-managers) have submitted an HGMP to NMFS pursuant to limit six of the ESA 4(d) Rule for a summer steelhead hatchery program in the Skykomish River Basin, Washington.

The hatchery program is intended to contribute to fulfilling federal tribal trust responsibilities and treaty rights guaranteed through treaties and affirmed in *U.S. v. Washington* (1974). It is also designed to contribute to the survival and recovery of Puget Sound steelhead and produce summer steelhead for sustainable fisheries.

The Washington Department of Fish and Wildlife also submitted an ESA section 10(a)(1)(A) permit application for operation of a trap and haul program in the Skykomish River Basin. This program collects various species of salmon, steelhead, and trout from the fish ladder at Sunset Falls and transports the fish upstream for release into high quality habitat above the falls.
